

# Jose Williams Garcia Zuniga

Full Stack Developer & Data Analyst

## SUMMARY

Dedicated and results-driven Data Analyst and Python Developer with a passion for leveraging technology to solve complex problems and derive actionable insights from data. Experienced in data analysis, statistical methods, and programming languages. Skilled in analyzing large datasets, identifying patterns, and presenting findings effectively. Thrives in collaborative environments.

## WORK EXPERIENCE

### Software Developer

Jun 2024 – Present

#### Portes Saint-Michel

Montreal, Quebec, Canada

- ERP integrations and production automation.
- KPI reporting and SQL database development.
- API integrations and CSV data processing.
- Manufacturing process optimization and custom software development for manufacturing operations.

API

Automation

### IT Consultant (Outsourcing)

Mar 2021 – Apr 2024

#### Multipagos

- IT consulting services.
- Systems maintenance and support.
- Python-based development and automation.

Python

IT Consulting

Systems Maintenance

### Jr Data Analyst

2020 – 2021

#### Smart Business Solutions (SMBS)

Project: iMPACT Risk Management Solution (Benchmark Analytics®)

- Designed and implemented data pipelines for seamless ingestion, processing, and transformation of data.
- Collaborated with data scientists to prepare and analyze data for AI/ML-based predictive risk models.
- Deployed APIs for self-service risk visualization platforms.
- Utilized Python, SQL, and data analytics libraries extensively.

linkedin.com/in/jwgarciaz

twine003.github.io/portafolio

## TECHNICAL SKILLS

### PROGRAMMING LANGUAGES

Python (NumPy, Pandas, Matplotlib, SciPy)

JavaScript (Angular, React)

HTML & CSS

### DATA ANALYSIS & ML

Scikit-learn

BeautifulSoup & Scrapy

### DATABASE MANAGEMENT

PostgreSQL

MySQL & SQLite

Microsoft SQL Server

### DATA VISUALIZATION

Seaborn & Plotly

Tableau & Power BI

Excel, SAS, SPSS

### VERSION CONTROL

Git

## LANGUAGES

Spanish Native

English Professional

French Professional

- Senior Python Developer

Smart Business Solutions (SMBS)

Project: Various client projects (SMBS)

  - Led design, development, and maintenance of robust web applications using Django.
  - Utilized Django ORM for database schema definition and manipulation.
  - Developed APIs with Django REST Framework to enhance backend-frontend communication.

Django

Django ORM

Django REST Framework

APIs

2018 – 2021
- Director of Technology

Piki App

Managua, Nicaragua

  - Led innovation and applied real-world ideas for technological advancements.

Technology Leadership

Innovation

Jan 2019 – Aug 2019
- IT Manager

DECIMO

  - Managed IT operations and implemented technological solutions.

IT Management

Operations

Oct 2015 – Aug 2018
- IT Manager

IBW Nicaragua

  - Managed IT operations for one of Nicaragua's pioneering internet service and telecommunications providers (broadband connectivity, hosting, corporate IT services).

IT Management

Operations

Networking

2011 – 2015

## ■ EDUCATION

- B.Sc. in Systems Engineering

National University of Engineering of Nicaragua

Completed all coursework and graduated from the program earlier; thesis defense and official degree conferral took place in 2021.

2021
- Data Analytics Program

Masterschool

2023
